

SOME SIMPLE CONDITIONS OF STRONGLY-STARLIKENESS
AND SPIRALLIKENESS OF A GIVEN ORDER

MARGIT PAP

Abstract. In this paper we deduce from Theorem A of the author, proved in paper [8], some simple conditions of strongly-starlikeness and spirallikeness of a given order.

Our results generalize and unify certain known results due to S. Ponnusamy [9] and V. Anisui, P. T. Mocanu [1].

MSC 2000. 34C45.

Key words. Differential subordination, strongly-starlike function, spirallike function of given order.
