

REGULAR REFRACTION PROPERTY OF THE PARABOLIC
LENS

PETRU T. MOCANU

Abstract. We show that any parabolic lens has the regular refraction property of index γ (with respect to its focus) if and only if $0 \leq \gamma \leq \sqrt{2}$.

MSC 2000. 30C45, 78A05.

Key words. Starlike curve, convex curve, parabolic lens, regular.
