

THE MOMENTS OF BERNSTEIN-STANCU OPERATORS
REVISITED

DAN MICLĂUȘ

Abstract. In the present paper the author establishes a general formula concerning calculation of the test functions by Bernstein-Stancu operators and also gives in this general case, an appropriate application.

MSC 2010. 41A10, 41A36.

Key words. Bernstein operators, Bernstein-Stancu operators, test functions, falling factorials, Pochhammer symbol, Stirling numbers of second kind.
