

A UNIVALENCE CONDITION FOR ANALYTIC FUNCTIONS
IN THE UNIT DISK

VERONICA OANA NECHITA

Abstract. In this paper we give a univalence criterion for analytic functions in the unit disk, which generalizes previously known, recent results. We use the method of Loewner chains in order to prove our main theorem.

MSC 2010. 30C55

Key words. univalent function, univalence criteria, Loewner chain.
