MATHEMATICA

Historical note

MATHEMATICA was founded by Petre Sergescu in 1929 with the support of Dimitrie Pompeiu and Gheorghe Ţiţeica (the first directors of the journal), as well as of other members of the Faculty of Sciences from the University of Cluj. The journal was published without interruption between 1929 and 1948 and then, as a new series, from 1959 until today.

Publisher

MATHEMATICA is published by the Romanian Academy Publishing House under the auspices of the Mathematical Section of the Romanian Academy and the Department of Mathematics from Babeș-Bolyai University Cluj-Napoca. Romanian Academy and Babeș-Bolyai University Cluj-Napoca appoint and support the editorial work of the journal.

Aims and scope

Mathematica publishes original papers, preferably written in English, but also in French, German or Italian, in any area of pure and applied mathematics. In addition to research papers, the journal publishes proceedings of international conferences held in Romania and survey articles. The Editors will put strong emphasis on originality and applicability of the results. All manuscripts are strictly refereed and only papers of high quality are accepted for publication. The journal is reviewed or indexed by *Zentralblatt für Mathematik*, *Mathematical Reviews*, *Scopus* and *EBSCO*.

Information for authors

Our journal agrees with the international standards developed by COPE (Committee of Publication Ethics, `https://publicationethics.org`) for promoting integrity in research publication.

We strongly encourage electronic submission of the papers on the e-mail address of the Editorial Office. We also accept submissions by mail on the address of the Editorial Office, in which case the authors are requested to send the manuscript in duplicate. The authors are asked to provide an electronic address. Since the maximum number of pages of a yearly volume is 200, we recommend to the authors to submit papers not exceeding 15 printed pages. Manuscripts not accepted for publication are not returned to the authors. Uppon acceptance, manuscripts should be carefully prepared by the authors using LaTeX with the `amsart.cls` document class and `mathcluj.sty` style file, available on the web page of the journal. Authors are requested to follow the arrangements in the sample article on our web page, or in a recent issue, for the style of sections, headings, equations, tables, figures and references.

Copyright information

The submission of a manuscript carries with it the author's assurance that it has not been copyrighted or published elsewhere (except in the form of an abstract or as part of a published lecture or thesis); that is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, and, after being accepted by *Mathematica*, it will not be published in another journal.

MATHEMATICA

VOLUME 66 (89), N° 2, December 2024

CONTENTS

Ahmad Al-Omari, Murad Özkoç, and Santanu Acharjee
Primal-proximity spaces 151
Shahabaddin Ebrahimi Atani
S-prime property in lattices 168
Awatef Azaza and Elkadri Samir
On some algebraic and transcendental continued fractions over a finite field 188
Bouharket Benaissa and Noureddine Azzouz
Tchebyshev-type inequalities with three functions 200
Mohamed Ben Chrouda
Helmholtz equations for the Laplace operator and its powers 210
Mahmoud El Ahmadi, Abdesslem Ayoujil, and Mohammed Berrajaa
On Kirchhoff-double phase problems without (AR)-condition 216
Abdelaziz El Boukili, Amar Rhazi, and Bouazza El Wahbi
An alternative solution to the problem of real cubic moment 230
Ahmed Hamrouni and Abdelbaki Choucha
Blow-up of solutions for a viscoelastic Kirchhoff equation with a source, delay and Balakrishnan-Taylor damping terms 249
Hamideh Rahmani and Alireza Kamel Mirmostafaee
Some remarks on generalizations of the reverse order law in a $*$-ring .. 262
Hery Randriamaro
Face counting for topological hyperplane arrangements 278
Abdelilah Zerbane, Slimane El Amrani, Abderrahmane Raji and Abdelkarim Boua
Study of the structure of near-rings with additive maps 289
