MATHEMATICA

Historical note

MATHEMATICA was founded by Petre Sergescu in 1929 with the support of Dimitrie Pompeiu and Gheorghe Țițeica (the first directors of the journal), as well as of other members of the Faculty of Sciences from the University of Cluj. The journal was published without interruption between 1929 and 1948 and then, as a new series, from 1959 until today.

Publisher

MATHEMATICA is published by the Romanian Academy Publishing House under the auspices of the Mathematical Section of the Romanian Academy and the Department of Mathematics from Babeș-Bolyai University Cluj-Napoca. Romanian Academy and Babeș-Bolyai University Cluj-Napoca appoint and support the editorial work of the journal.

Aims and scope

Mathematica publishes original papers, preferably written in English, but also in French, German or Italian, in any area of pure and applied mathematics. In addition to research papers, the journal publishes proceedings of international conferences held in Romania and survey articles. The Editors will put strong emphasis on originality and applicability of the results. All manuscripts are strictly refereed and only papers of high quality are accepted for publication. The journal is reviewed or indexed by *Zentralblatt für Mathematik*, *Mathematical Reviews*, *Scopus* and *EBSCO*.

Information for authors

Our journal agrees with the international standards developed by COPE (Committee of Publication Ethics, <https://publicationethics.org>) for promoting integrity in research publication.

We strongly encourage electronic submission of the papers on the e-mail address of the Editorial Office. We also accept submissions by mail on the address of the Editorial Office, in which case the authors are requested to send the manuscript in duplicate. The authors are asked to provide an electronic address. Since the maximum number of pages of a yearly volume is 200, we recommend to the authors to submit papers not exceeding 15 printed pages. Manuscripts not accepted for publication are not returned to the authors. Upon acceptance, manuscripts should be carefully prepared by the authors using L^AT_EX with the `amsart.cls` document class and `mathcluj.sty` style file, available on the web page of the journal. Authors are requested to follow the arrangements in the sample article on our web page, or in a recent issue, for the style of sections, headings, equations, tables, figures and references.

Copyright information

The submission of a manuscript carries with it the author's assurance that it has not been copyrighted or published elsewhere (except in the form of an abstract or as part of a published lecture or thesis); that is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, and, after being accepted by *Mathematica*, it will not be published in another journal.

MATHEMATICA

VOLUME 67 (90), N° 1, June 2025

CONTENTS

AHU ACIKGOZ and TAKASHI NOIRI	
Idealizability of some expansions of open sets	3
OMAR FAROUK AID and ABDERRAHMANE SENOUSSAOUI	
The Hilbert-Schmidt property for a particular class of h -admissible	
Fourier integral operators	13
DILEK AKALIN and MURAD ÖZKOÇ	
On e^* - θ - D -sets and related topics	26
MOHAMMED ALLALI and CHAHNAZ TIMIMOUN	
Stability of the KdV equation in the case of mixed internal	
and boundary dampings with time-dependent delay	41
MOHAMMAD ALI DEHGHANIZADEH, BIJAN DAVAZ, and MURAT ALP	
On the crossed polysquare version of homotopy cokernels	56
REZA JAFARPOUR-GOLZARI	
A sequence of polynomial pairs assigned to a graph	71
ANASS LAMAIZI, MAHMOUD EL AHMADI, OMAR DARHOUCHE,	
and MOSTAFA ALLAOUI	
On a dynamic boundary condition for a class of nonlinear	
parabolic equations	78
FRANCIS MONDAY NKWUDA, JAMES ADEDAYO OGUNTUASE,	
and HAMMED ANUOLUWAPO ABASS	
A modified inertial extragradient algorithm for some class	
of split variational inequality problem	91
ADRIAN PETRUŞEL, IOAN A. RUS, and MARCEL-ADRIAN ŞERBAN	
Some research directions in fibre contraction theory	
and its applications	112
WAJDI TOUHAMI	
On the integral representation of excessive functions	
under Bochner subordination	130
